SUMMARY

Innovative and scientifically rigorous recent graduate majoring in Computer Science and Engineering from North South University. I am a data science enthusiast. I am attentive to new technologies, take on leadership, and am good at analytical decision making.

EDUCATION

Bachelor of Science in Computer Science and Engineering (BSCSE)	2017–2019
North South University, CGPA: 3.60	
Higher Secondary Certificate (HSC)	2016
Rajuk Uttara Model College, GPA: 5.00	
Secondary School Certificate (SSC)	2014
Rajuk Uttara Model College, GPA: 5.00	

WORK EXPERIENCE

Research Assistant	April 2022 - July 2022
Department of Electrical and Computer Engineering North South University Supervisor: Dr. Nabeel Mohammed Research Domain: Bangla NLP	

SKILLS

Programming	Python, C, C++, Java, PHP, Latex
Frameworks	Keras, PyTorch, Tensorflow, Pandas, Matplotlib, OpenCV, Scikit Learn
Front-end	HTML5, CSS3, Bootstrap, ReactJs
Back-end	NodeJs, MySQL
Visualization Tool	PowerBI
OS	Windows, Linux
DevOps	Git
Platforms	MS Office, Adobe

CERTIFICATIONS

- [Hyperparameter Tuning with Keras Tuner](#)
- [Deep Learning with Pytorch: GAN](#)
- [Multivariate Calculus for Machine Learning](#)
- [Data Science Math Skills](#)
- [Introduction to Artificial Intelligence](#)
- [Linear Algebra for Machine Learning](#)
- [Introduction to AR and ARCore](#)
- [Introduction to Python](#)
- [Introduction to R](#)
- [Intermediate R](#)

PROJECTS

Transfer Learning for Speaker Diarization on Bangla Audio Dataset

[CSE499 Graduate Dissertation](#)

In this research, transfer learning was explored for speaker diarization on our own Bangla audio data. the approach experiments with different clustering algorithms and embedding techniques to reduce Diarization Error Rate, DER for noisy data.

Contrastive Learning for Text-to-Image on Paraphrasing Captions

[CSE498 CO-OP Research Project](#)

In this research, I presented a contrastive learning strategy to for enhancing the quality and semantic consistency of synthetic images by paraphrasing the captions from the CUB dataset.

A Deep Convolutional Neural Network for Bangla Handwritten Numeral Recognition

[CSE465 Pattern Recognition and Neural Network](#)

In this research, I studied the most unbiased and augmented Dataset NumtaDB to classify images in isolated Bangla numerals. I augmented synthetic data using Keras library, and fed the data to the training model in the pipeline stage. Furthermore, I used popular CNN network ResNet34 to better the performance of the model.

Outbreak Prediction and Visualization: Covid-19

[CSE299 Junior Design Project](#)

Here I used Global Outbreak Alert and Response Network (GOARN) data to predict the time of the highest spread of covid-19. The time-series visualization is done with Power BI.

Calculator with JavaScript

[JavaScript](#)

Use of ES6 classes to organize code, syncing JavaScript code with UI, CSS Grid, Flexbox etc.

EXTRA-CURRICULAR ACTIVITIES

Arduino Workshop at NSU ACM Student Chapter	2018
Worked on building obstacle avoiding robot	

Computer and Engineering Club at North South University	2017–2019
Junior member	

Debating Club at RUMC	2012–2014
Participated in the in-house Parliamentary Debating Competition	

Inhouse Handball Tournament at RUMC	2014–2015
Regional Champion of Intra-School Handball Tournament	

ATTRIBUTES

Design Skills	AutoCAD, Sketch up
Soft Skills	Leadership, Team work, Adaptability, Digital Literacy
Language Proficiency	English, Bangla
